4. Type Conversion

The screenshot shows a Python IDE with a file named `04.py`. The code in the editor is as follows:

```
1 name = input("What's your name? ")
2 print(type(name))
3
4 year = int(input("What's your age? "))
5 print(type(year))
6
7 age = 2021 - year
8 print("You're " + str(age) + " years old.")
```

The output window at the bottom shows the following text:

```
Microsoft Windows [Version 10.0.17134.0]
(c) 2018 Microsoft Corporation. All rights reserved.
C:\Users\user>python 04.py
What's your name? John
What's your age? 20
You're 2 years old.
```
